

## **BACHELOR OF FINE ARTS IN ART**

## **PROGRAM LEARNING GOALS**

- 1. To provide a broad-range of artistic processes used for the creation of original works of art
- 2. To establish a strong background in the cultural, historical, or social contexts that influence the creation of visual art
- 3. To develop effective critical thinking strategies in their work
- 4. To learn to effectively evaluate their own works of art and the creative works of others
- 5. To introduce the principles of two-dimensional and three-dimensional design
- 6. To establish the understanding and application of color theory
- 7. To provide educational experiences where the technologies and equipment relevant to art and design are introduced and utilized
- 8. To exhibit an aesthetic awareness through the creation of art or the formation of a critical response to art
- 9. To provide awareness with art historical issues, current concepts, and directions
- 10. To perceptively analyze works of art/design and to evaluate them critically
- 11. To effectively utilize the vocabulary of art/design in both written and verbal form
- 12. To provide quality visual arts experiences to all students at the University of Tampa
- 13. To create artwork that demonstrates perceptual acuity, conceptual understanding, and technical facility at a professional entry level in their chosen concentration
- 14. To express personal ideas and formulate artistic statements through the process of artistic production and writing
- 15. To become individualists who are able to contribute inventively and creatively to their culture through the making of art
- 16. To apply research and analytic strategies and skills to obtain effective visual communication
- 17. To gain a thorough understanding of professional art practices
- 18. To produce a senior exhibition, within a studio concentration, which demonstrates conceptual depth and an appropriate level of technical mastery

## **PROGRAM COMPETENCIES**

- 1. Students will learn to aesthetically employ the elements of art and the principles of design with a wide variety of media and technique in both two-dimensional and three-dimensional space
- 2. Students will gain a competency in the principles of design, color theory, art media and formats, with proficiency to apply them aesthetically
- 3. Students will demonstrate competency in drawing to work in specific fine arts areas
- 4. Students will be able to articulate the similarities, differences, and relationships among the various fine arts areas

- 5. Students will demonstrate competency in the use of basic tools, techniques, and processes sufficient to works of art from concept through execution
- Students will be able to articulate, in both verbal and written form, the formal, technical and conceptual foundations of works of art, including identifying appropriate cultural and historical references
- 7. Students will be able to synthesize the expressive possibilities of various media, both digital and traditional, and the diverse conceptual modes available
- 8. Students will be able to demonstrate knowledge of the historical, social, and politically issues of art critically and comparatively; and relate these discoveries to their personal work
- 9. Students will demonstrate the ability to generate multiple solutions and different ideas relating to singular concepts.
- 10. Students will demonstrate the ability to independently synthesize and work with a variety of personalized art and/or design questions.
- 11. Students will develop a concentrated expertise in a particular medium, technique, process and/or theme, created in an individualistic and innovative manner to produce a significant body of work that is technically proficient and conceptually rigorous
- 12. Students will produce a culminating senior exhibition of their work that will demonstrate professional presentation, proper display and lighting, a developed publicity plan and the hosting of a public reception.
