

Effectiveness in Meeting Goal 3

The program demonstrates effectiveness in meeting this goal through a structured and expanding interprofessional education model embedded across the curriculum.

Evidence of effectiveness includes:

- Implementation of **4 IPE events per term**
- Intentional alignment of IPE experiences with the **ASCEND course series**
- Implementation of **annual campus interprofessional activities**
- Expansion of **end-of-program survey questions** focused on interprofessional communication and teamwork
- Graduate feedback supporting the value of teamwork, communication, simulation, and collaborative learning in preparation for practice

As a newer program goal, longitudinal outcome data are still being collected. The program will continue to evaluate Goal 3 through participation tracking, end-of-program survey results, and competency-based assessment of communication and collaborative practice skills.
